UNIVERSAL RTS RECEIVER

Universal RTS Receiver
Part # 1810627

The Somfy Universal RTS Receiver provides RTS capability to Somfy's standard motors. It can be used as a stand-alone radio control or with Somfy's RTS sensor for sun and wind control. Two user-defined intermediate positions can be programmed. This 110V control is packaged in a weatherproof enclosure and includes watertight strain-relief fittings for wires entering the box.

NOTE: The Universal RTS Receiver will now replace the following receivers: Centralis, Eolis and Soliris. These receivers are DISCONTINUED.

Universal RTS Receiver

PRODUCT HIGHLIGHTS

- The first transmitter needs to be programmed to the control using the on-board programming button before anything else can be done.
- Adding or deleting transmitters can be done via transmitters or using the on-board programming button.
- The Universal RTS Receiver now provides a visual feed back in the form of a jog identical to the Altus and RTS CMO motors during the programming function.
- This receiver is NOT compatible with Somfy's wired non-RTS sun and/or wind sensors.

COMPATIBLE WITH:

Single Channel RTS Transmitters

1810643 1810632

1810639 1810650

Five Channel RTS Transmitters

1810645 1810633

1810641 1810652

Telis Soliris RTS Transmitters
